

# Sustainable SharePoint Adoption Assessment

## It's time to get serious with SharePoint as a business platform for your enterprise

- Common challenges include:**
- Engaging users to fully maximize SharePoint to address day-to-day business needs
  - Making information easily accessible
  - Ensuring that sensitive information is protected and monitored
  - Building relevant business solutions that remain effective over time

**Sustainable SharePoint Adoption Assessment** takes a holistic approach that enables SharePoint to meet your organization's people, policy, processes & technology needs.

With this program, you will get:

- **Executive Briefing:** key stakeholders will be educated and engaged in an interactive session on how Microsoft technologies such as SharePoint, Office, Yammer, mobile, line of business systems and AvePoint's Compliance Guardian can deliver relevant business value.
- **Discovery:** Innovative-e subject matter experts will facilitate structured sessions to elicit, analyze and prioritize your business needs with SharePoint capabilities.
- **Interactive Analysis:** results from the discovery will be presented and reviewed with key stakeholders which will cover business needs validation, information architecture, governance, compliance, IT capabilities and user adoption strategies.
- **Roadmap:** implementation recommendations are summarized and prioritized. This 12-18 month roadmap is a high-level implementation plan that includes estimated timelines, resources, effort, and costs.

Let Innovative-e and AvePoint help you to achieve Sustainable SharePoint Adoption today!
